; - repeat previous f, t, F or T Registers

movement

Global	Editing	Cut and paste	Working with multiple files
:help keyword - open help for keyword	r - replace a single character	yy - yank (copy) a line	:e file - edit a file in a new buffer
:saveas file - save file as	J - join line below to the current one with one space in between	2yy - yank (copy) 2 lines yw - yank (copy) the	:bnext or :bn - go to the next buffer
:close - close current pane	gJ - join line below to the current one without space in between	characters of the word from the cursor position to the start of the next word	:bprev or :bp - go to the
K - open man page for word under the cursor			previous buffer
Cursor movement	gwip - reflow paragraph	y\$ - yank (copy) to end of line	: bd - delete a buffer (close file)
h - move cursor left	cc - change (replace) entire	p - put (paste) the clipboard after cursor	:1s - list all open buffers
j - move cursor down	line C - change (replace) to the end	P - put (paste) before cursor	:sp file - open a file in
k - move cursor up	of the line	dd - delete (cut) a line	new buffer and split windo :vsp file - open a file i
1 - move cursor right	c\$ - change (replace) to the end of the line	2dd - delete (cut) 2 lines	new buffer and vertically sp
H - move to top of screen	Ciw - change (replace) entire	dw - delete (cut) the characters of the word from	Ctrl + ws - split window
M - move to middle of screen	word	the cursor position to the start of the next word	Ctrl + WW - switch window
L - move to bottom of screen	CW - change (replace) to the end of the word	D - delete (cut) to the end of	Ctrl + wq - quit a window
W - jump forwards to the start of a word	S - delete character and	the line	Ctrl + wq - quit a window
W - jump forwards to the start	substitute text	d\$ - delete (cut) to the end of the line	vertically
of a word (words can contain punctuation)	S - delete line and substitute text (same as cc)	x - delete (cut) character	Ctrl + wh - move cursor t the left window (vertical sp
e - jump forwards to the end	xp - transpose two letters	Exiting : W - write (save) the file, but don't exit	Ctrl + wl - move cursor the right window (vertical split)
of a word	(delete and paste)		
E - jump forwards to the end of a word (words can contain punctuation)	u - undo Ctrl + r - redo	:w !sudo tee %-write	Ctrl + wj - move cursor the window below (horizon
b - jump backwards to the start of a word	• - repeat last command	out the current file using sudo :WQ or :X or ZZ - write (save)	split) Ctrl + wk - move cursor t
	Marking text (visual mode)	and quit	the window above (horizon split)
start of a word (words can contain punctuation)	v - start visual mode, mark lines, then do a command (like	: q - quit (fails if there are unsaved changes)	Spire)
% - move to matching character (default supported	y-yank) V - start linewise visual mode	:q! or ZQ - quit and throw away unsaved changes	
pairs: '()', '{}', '[]' - use :h matchpairs in vim for more info)	o - move to other end of marked area	:wqa - write (save) and quit on all tabs	
0 - jump to the start of the line	Ctrl + v - start visual block	Search and replace	
^ - jump to the first non-blank character of the line	mode O - move to other corner of	/pattern - search for pattern	
\$ - jump to the end of the line	block	?pattern - search backward	
g jump to the last non-	aw - mark a word	for pattern	
blank character of the line	ab - a block with ()	\vpattern - 'very magic' pattern: non-alphanumeric characters are interpreted as	
gg - go to the first line of the document	aB - a block with {}	special regex symbols (no escaping needed)	
G - go to the last line of the	ib - inner block with () iB - inner block with {}	n - repeat search in same	
document 5 G - go to line 5	ESC - exit visual mode	direction	
	Visual commands	N - repeat search in opposite direction	
of character x	> - shift text right	:%s/old/new/g-	
tx - jump to before next occurrence of character x	← - shift text left	searchAndReplace.commands .colonPercentForwardSlashOldFo	
Fx - jump to previous	y - yank (copy) marked text	:%s/old/new/gc - searchAndReplace.commands	
occurence of character x	d - delete marked text	.colonPercentForwardSlashOldFor	
Tx - jump to after previous occurence of character x	~ - switch case	:noh - remove highlighting of	
occurrence of enaracter in		search matches	

Search in multiple files

Tabs

:tabnew or :tabnew {page.words.file} open a file in a new tab

 $\mathbf{Ctrl} + \mathbf{wT} - \mathbf{move}$ the own tab

 ${\tt gt\ or\ :tabnext\ or\ :tabn}$ - move to the next tab

 $gT\ \mathrm{or}$:tabprev or :tabp - move to the previous tab

 $\mbox{\tt \#gt}$ - move to tab number $\mbox{\tt\#}$

:tabmove #-move current tab to the #th position (indexed from o)

:tabclose or :tabc close the current tab and all $% \left\{ \left(1\right) \right\} =\left\{ \left(1\right)$ its windows

:tabonly or :tabo - close all tabs except for the current one

:tabdo command - run the command on all tabs (e.g. :tabdo $\,$ q - closes all opened tabs)

current split window into its

, - repeat previous f, t, F or T	:reg - show registers content	
movement, backwards	"xy - yank into register x	
} - jump to next paragraph (or function/block, when editing code)	"xp - paste contents of register x	
{ - jump to previous paragraph (or function/block, when editing code)	Marks : marks - list of marks	
ZZ - center cursor on screen	ma - set current position for mark A	
Ctrl + e - move screen down one line (without moving cursor)	`a - jump to position of mark A	
Ctrl + y - move screen up one line (without moving cursor)	y`a - yank text to position of mark A	
	Macros	
Ctrl + b - move back one full screen	qa - record macro a	
Ctrl + f - move forward one	q - stop recording macro	
full screen	@a - run macro a	
Ctrl + d - move forward 1/2 a screen	@@ - rerun last run macro	
Ctrl + u - move back 1/2 a screen		
Insert mode - inserting/appending text		
\boldsymbol{i} - insert before the cursor		
\boldsymbol{I} - insert at the beginning of the line		
a - insert (append) after the cursor		
A - insert (append) at the end of the line		
o - append (open) a new line below the current line		
0 - append (open) a new line above the current line		
ea - insert (append) at the end of the word		

Esc - exit insert mode

- :vimgrep /pattern/
